THE SAFE STAINING SOLUTION

BCC

 Blue
Color
Caps®

BCC BlueColorCaps® is presented in sterile single-dose syringes containing 0.75 ml of 0.06 % Trypan Blue solution, available in packages of 10 syringes. It is uniquely formulated to guarantee purity and safety on the highest level.

Proven staining agent

Trypan Blue is the best studied vital dye used in ophthalmic surgery

Supreme quality and safety¹

High purity of raw material

Optimal concentration

0.06 % Trypan Blue

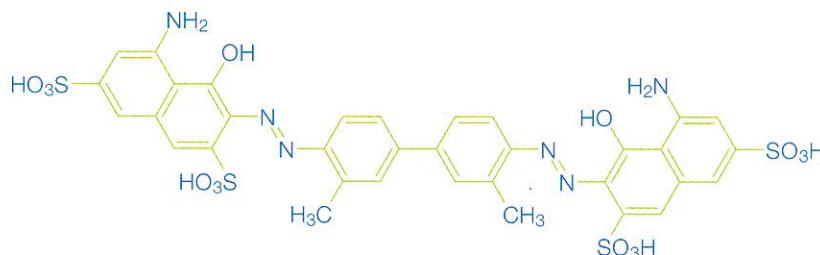

Ready-to-use

Assembled sterile syringes

The ideal solution for numerous cases...

- Higher success rates in continuous curvilinear capsulorhexis (CCC) in mature cataracts¹
- Paediatric cataract surgery²
- Finding/visualizing clear corneal incision by coating the blade with Trypan Blue³
- Learning process of trainee surgeons in absence of red reflex⁴
- Penetrating and deep lamellar keratoplasties⁵
- Evaluation of corneal endothelial cell viability⁶
