

# Improved Intraocular Surgical Control and Precision in Surgical Maneuvers

## Micro Forceps and Scissors

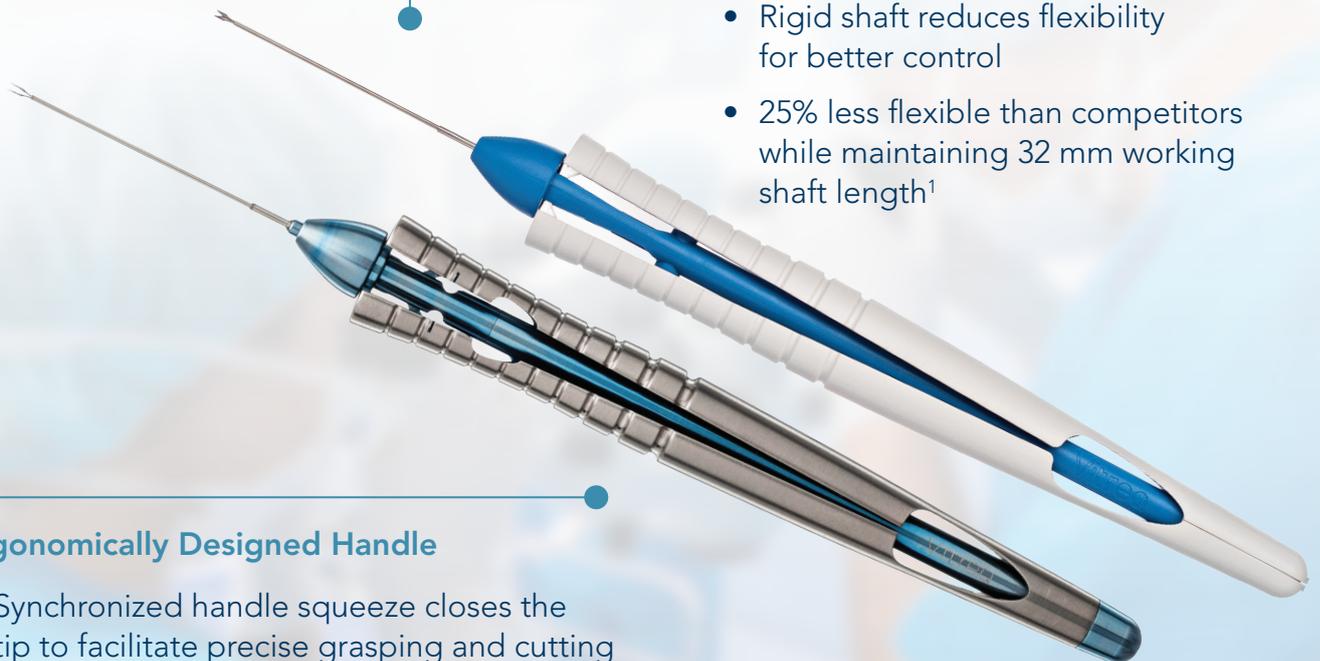

### Tip Design

- Shortened tip provides stronger grasping force<sup>1</sup>

### Shaft Design

- Rigid shaft reduces flexibility for better control
- 25% less flexible than competitors while maintaining 32 mm working shaft length<sup>1</sup>

### Ergonomically Designed Handle

- Synchronized handle squeeze closes the tip to facilitate precise grasping and cutting
- Round handle allows for easy tip alignment

## Gauge Size with Color Coding

### Single-Use

All Single-Use  
Sold in 5/Bx

### Reusable

## Serrated Gripping

- Blunt-tipped forceps with serrated internal surface
- Blunt tip for atraumatic grasping
- Serrated grasping tips for strong membrane grasping

### PRIMARY APPLICATIONS

- Grasping of strong adherent PVR membranes

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D02         | FC23.R02       |
| 25G        | FC25.D02         | FC25.R02       |

## ILM End-gripping

- ILM end-gripping platforms
- Thin instrument tips
- Improved visualization for grasping thin membranes

### PRIMARY APPLICATIONS

- ILM and ERM peeling
- Fine membrane peeling

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D03         | FC23.R03       |
| 25G        | FC25.D03         | FC25.R03       |
| 27G        | FC27.D03         | FC27.R03       |

## Asymmetrical Gripping

- Asymmetrical tip allows excellent visualization at grasping area
- Interior end-gripping platforms designed for assured grasping

### PRIMARY APPLICATIONS

- Versatile tip design targets ILM, fine epiretinal membranes and diabetic PVR membranes
- Excellent multipurpose instrument

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D04         | FC23.R04       |
| 25G        | FC25.D04         | FC25.R04       |

## Eckardt Endgripping

23G

25G

27G

- Eckardt forceps with wider tip enhances surface grasping and reduces tearing effect
- Shorter tip branches enhance grasping and holding powers
- Tip design allows optimal visualization of surgical field

### PRIMARY APPLICATIONS

- ILM and ERM peeling
- General peeling of fine membranes which needs end-gripping action
- Excellent multipurpose instrument

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D05         | FC23.R05       |
| 25G        | FC25.D05         | FC25.R05       |
| 27G        | FC27.D05         | FC27.R05       |

## Shah X-tra Grip\*

23G

25G

27G

- Fine Tipped Forceps with Serrated Jaws platform
- Serrations angled 45° for maximum grasping of tissue

### PRIMARY APPLICATIONS

- Fine tips allow for ILM lifting
- Serrated platform grasps and holds tissue, preventing slippage
- Effective for all types of tissue manipulation, ILM, ERM, PVR and diabetic tissue

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D07         | FC23.R07       |
| 25G        | FC25.D07         | FC25.R07       |
| 27G        | FC27.D07         | FC27.R07       |

## Kuhn 45° Power Gripping\*

23G

25G

- Designed for peeling proliferative intravitreal, epi and sub-retinal membranes, lens capsule, iris, small IOFB, fibrinous membranes, as well as ILM & ERM membranes and posterior hyaloids
- With a 45° crocodile design inner surface, this design enables selective, strong grasping, and visibility of the target tissue

### PRIMARY APPLICATIONS

- All-purpose forceps for standard and heavy duty membrane peeling

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | FC23.D06         | FC23.R06       |
| 25G        | FC25.D06         | FC25.R06       |

"I have not come across any task in the eye that I am not able to do with the Kuhn 45° Power Forceps."

— Professor Ferenc Kuhn

## Vertical

23G

25G

27G

- Sharp-tipped vertical cutting scissors

### PRIMARY APPLICATIONS

- Cutting perpendicular to the retina
- Resection of membranes

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | SC23.D01         | SC23.R01       |
| 25G        | SC25.D01         | SC25.R01       |
| 27G        | SC27.D01         | SC27.R01       |

## Straight

23G

25G

- Sharp-tipped straight cutting scissors

### PRIMARY APPLICATIONS

- Cutting in the iris plane
- For cutting peripheral membranes

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | SC23.D02         | SC23.R02       |
| 25G        | SC25.D02         | SC25.R02       |

## Horizontal Curved

23G

25G

27G

- Sharp-tipped horizontal curved cutting scissors
- Curvature of 12mm to follow the contour of the retina for improved safety
- In closed position functional as pick

### PRIMARY APPLICATIONS

- Cutting membranes adherent to the retinal surface
- All-purpose horizontal membrane cutting

| Gauge Size | Single-Use SKU # | Reusable SKU # |
|------------|------------------|----------------|
| 23G        | SC23.D03         | SC23.R03       |
| 25G        | SC25.D03         | SC25.R03       |
| 27G        | SC27.D03         | SC27.R03       |

## Reusable Cleaning Adapter

**FCOO.R03: Unique cleaning/sterilization adapter included with every reusable instrument**
